1.8, 2.1, 2.4, 2.7, 3.0, 3.6 & 4.2 with special sizes upon request.

Brooklyn Post

Manhattan Post

LAMINATED POSTS

Why is a laminated post better than a solid timber post?

- H5 CCA POSTS ARE TREATED PRIOR TO MANUFACTURING
This gives better treatment penetration as the timber dimensions are smaller.
- STRONGER THAN SOLID TIMBER
Laminating gives added strength, consistent every time.
- STABLE
Laminated posts do not warp or twist.
MANUFACTURED TO STRUCTURAL STANDARDS

FEATURE POSTS & PILLARS

Special Features

- H5 CCA Treated Radiata Pine
- Kiln Dried for consistency of dryness
- Water proof structural adhesive
- Replica or Contemporary post caps can be added to finish the top
- Letter box fittings available in Black, Silver or Brass.

The Brooklyn and Manhattan feature posts have been used to grace this fence line, and topped with the Replica Ball post cap.
