C-Bus lighting control

Using intelligent lighting to come home to

Smart living

Imagine a home that thinks for itself.
A home that reflects your lifestyle.

Schneider Electric's C-Bus home automation system offers just this and more, improving your comfort, safety and security, while delivering energy efficiency savings.

Schneider
Electric

Whatever your mood, we have a mode

Luxurious lifestyle

C-Bus is an intelligent home automation system, which provides you with complete control over your lighting, security systems, audio equipment, household appliances, electrical equipment and much more. It allows you to create the perfect environment for any event from parties to cosy nights in.

The art of modern living

As well as offering superb functionality, our C-Bus system brings together stylish, well-designed controls in a choice of finishes. From sleek pure glass to elegant touch screens, we have a style to suit any interior.

Simplicity at its best

Offering endless, simple-to-use programmable features, C-Bus can be used to suit the way you live. Its numerous options include a welcome home and goodbye mode, which create the perfect environment by turning on selected room lights, heating and music when you arrive home, and switching everything off when you leave. It can even be set to draw the curtains and blinds when it gets dark and can turn on the heating, so the house is warm and cosy for when you arrive home.

Peace of mind

The system can be programmed to provide additional security benefits with a holiday mode, which can simulate occupancy when the house is empty, by opening and closing curtains and switching lights on and off. You can also light up your home in an instant with a panic mode, which will turn on all external and internal lights if you hear an unexpected noise.

Smart savings

Up to 40% energy saving solutions for residential and small buildings

↓
20% to 25% of consumed energy

↓
Heating is 30% of energy usage

↓
Lighting & appliances are over 40%

Black and white touchscreens
Available in a range of styles and colours, with a large graphical interface which can be customised to suit your needs.

Reflection switches
Reflection is a sleek, contemporary design that is constructed from smooth stainless steel and boasts a flat rectangular switch plate without unsightly screws.

Colour touchscreens
The Colour Touchscreen replaces multiple wall switches to add a touch of enviable style to any home. The screen can be personalised with your own colour scheme, photographs or screensavers.

DLT switches
The DLT allows switch buttons to be electronically labelled according to your needs. The units have eight function buttons over two pages, a backlight for easy viewing, and supports up to eight languages.
